### **DETAILED ACTION**

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

#### ***Claim Rejections - 35 USC § 103***

Claims 1, 3-5, 18-22 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Katagiri et al. or Taylor et al. in view of Wieczorek.

Applicants argue that an intermediate step is performed in the references in making the claimed amino alcohol, but applicant also does this intermediate step as is noted at page 5 of the instant specification. Further, the claims do not exclude an intermediate step.

Wieczorek makes it clear that lithium borohydride is also known like sodium borohydride to be used to prepare aminoalcohols, col. 10. Thus they are functional equivalents. Sodium cyanoborohydride is also noted to be a functional equivalent as well.
